Automated Teller Cash Dispensers have been one of our key products for more than a dozen years. They have been offered in the Polish market in cooperation with the De La Rue, a leading provider of cash handling equipment and software solutions to banks and retailers worldwide.

Here are the main features of TCD

- withdrawal of banknotes at the teller position together with the current booking of transactions,
- improving the work of two tellers at the same time,
- proper software to provide service to customers by more than two tellers,
- easy integration into banking computer systems,
- flexible configuration of deposit modules.

TCD functions together with teller locker safes and deposit modules (figures in the front and below) secure cash handling process.

The proper configuration of the equipment allows for through-the-wall installation, what increases the

safety during the supply of new cash and return of withdrawn cash in the back rooms behind the wall.

Compact, space saving models of the automated tellers cash dispensers at accordingly, low prices

FHU GLOBE Ltd. offers also other models of the automated teller cash dispensers:
