

Multi Denomination Cash Dispenser GP

Multi-denomination cash dispenser dispenses automatically banknotes of four denominations after the teller orders the required sum at the level of the banking computer system ...

Multi-denomination cash dispenser dispenses automatically banknotes of four denominations after the teller orders the required sum at the level of the banking computer system (after integration into the system) or at the level of the computer terminal after installing the proper software.

Safety

The device shall be provided with the following safety requirements:

- Cabinet may be anchored to flooring,
- Drawer shall be opened only after prior logging in by an authorized person using a chip key and Pin code,
- Opening of any drawer and/or compartment shall be safeguarded by a time delay control mechanism,

OPTIONS:

- Triggering of a silent alarm mechanism during the cash withdrawal,
- Triggering of a silent alarm mechanism from the on-line computer keyboard at any time,
- Limited amount of a single cash withdrawal.

The device is equipped with a cash-dispensing module that has four separate cassettes for banknotes of four denominations, each up to 1000 notes. Time delay locks safeguard all cabinet drawers and/or compartments.
